Nevada Geothermal Power Inc.
Announces Hotter than Anticipated Temperatures at Blue Mountain
28A-14 Development Well - Higher Capacity; Hotter, Shallower

VANCOUVER, B.C. (September 11th, 2006) – Nevada Geothermal Power Inc. (NGP) (TSX-V: NGP, OTC-BB: NGLPF) is pleased to announce preliminary results from the successful initial development well at Blue Mountain. The well 28A-14 flowed at a high volume of super-heated water unassisted from depths between 2240 feet (683 metres) and 2815 feet (858 metres). The temperature measured at the bottom of the well, exceeded expectations at 361°F (183°C). NGP is currently completing a 12-hour flow test to determine the well capacity and flow characteristics.

“We are delighted by the results at 28A-14, as this will be a high-volume geothermal well with a capacity greater than 5 MW. The higher temperatures encountered at shallower depths than expected are highly encouraging. These are the highest temperatures yet measured at Blue Mountain.” stated Brian Fairbank, CEO & President. “If the next wells continue to encounter these high temperatures, it would result in higher average well capacities and lower costs.”

NGP will move the production drill rig 1500 feet (500 metres) south to well site 38-14 by mid September. At the new location, a 20-inch casing has already been set to 600 feet (183 metres). Comparatively high temperature conditions and boiling water were encountered. The well is expected to yield similar results to 28A-14.

(See attached photo of 28A-14 flow test taken on Sunday, September 10, 2006 by clicking on the following link: <http://www.ccnmatthews.com/docs/ngp0911.jpg>).

About Nevada Geothermal Power Inc.

Nevada Geothermal Power Inc. is a renewable energy company exploring and developing geothermal projects in the United States to provide electrical energy that is clean, efficient and sustainable. NGP is committed to the geothermal industry and currently owns a 100% leasehold interest in the Blue Mountain, Pumpnickel, Black Warrior projects in Nevada and the Crump Geyser Project in southern Oregon.
